1 Examples of extensions contained in KMITS solution

1.1 VAT model

- Creating new or updating Vendor/Customer record using ARES/VIES

The screenshot shows the 'Vendor' list screen in Microsoft Dynamics 365. The top navigation bar includes 'Save', '+ New', 'Delete', 'Vendor', 'Procurement', 'Invoice', 'General', 'Options', and 'Security'. The 'Vendor' tab is selected. Below the navigation is a ribbon with 'Maintain', 'Copy', 'Set up', 'Transactions', 'Related information', 'Registration', and 'Properties'. The 'Registration' tab has a red box around it, specifically highlighting the 'Vendor update from ARES/VIES' option. The main area displays a table of vendors with columns for Vendor account, Name, Vendor hold, Phone, Extension, Primary contact, Currency, and Group. One row is selected, showing 'Kaufand Česká republika v.o.s.'.

- Periodic task of Payer reliability verification

The screenshot shows the 'Finance and Operations' ribbon in Microsoft Dynamics 365. The left sidebar lists various modules like Domá, Obecné položky, Nedávné, Pracovní prostory, Moduly, Accounts payable, Accounts receivable, Asset leasing, Asset management, Audit workbench, Budgeting, Cash and bank management, Common, Consolidations, Cost accounting, Cost management, Credit and collections, Engineering change management, Expense management, Fixed assets, General ledger, Human resources, and Inventory management. Under the 'Moduly' section, 'Periodic tasks' is expanded, showing options like Foreign currency revaluation, Vendor to ledger reconciliation report, Import one-time vendors and invoices, Process one-time vendors and invoices, Create prenotes, Submit proposed vendor changes, Import vendor invoices, Vendor marked transaction details, All marked transaction details, Batch dissolution of ancillary costs, and Payer reliability verification, which is highlighted with a red box and a star icon. The main area displays a grid of various business processes, each with a small icon and a brief description.

- possibility to export VAT file for Group VAT
- VAT Obligation Recording – excel (Záznamní povinnost DPH)
- Annual tax reduction calculation

The screenshot shows the Microsoft Dynamics 365 Finance and Operations interface. On the left, there is a navigation menu with various modules like Cost management, Credit and collections, and Tax. Under the Tax module, there are several sub-sections: Indirect taxes, Inquiries and reports, Declarations, and Periodic tasks. The 'Sales tax' section is highlighted with a red box. Within this section, specific items like 'Sales tax payments group VAT', 'VAT Obligation Recording - excel', 'Calculate year VAT reduction', and 'Settle and post sales tax' are also highlighted with red boxes.

- Complete set of Sales tax reporting codes as a base for VAT reporting

The screenshot shows the 'Sales tax reporting codes' screen in Microsoft Dynamics 365. The top navigation bar includes Save, New, Delete, Sales tax reporting codes, Options, Security, and a search bar. The main area displays a table of reporting codes, with the first row ('Sales tax reporting codes') highlighted by a red box. The table has columns for Report layout, Reporting code, Report text, and Brief description. The report text column contains descriptions in Czech, such as 'Daří SS_Režim přenesení daňové povinnosti Veta 1 ř.11 (WBW)' and 'Daří SS2_Režim přenesení daňové povinnosti Veta 1 ř.11'. The brief description column contains corresponding abbreviations like 'dan_rpren5' and 'rez_pren5'.

- Complete set of XML codes for VAT Control statement reporting

The screenshot shows a software interface with a left sidebar containing various management categories like Cost management, Credit and collections, etc. The main area is titled 'VAT Control Statement reporting XML codes'. It includes sections for 'XML ELEMENT', 'Setting', and 'XML attribute'. The 'XML ELEMENT' section shows entries for VetaA1 through VetaB3. The 'Setting' section has a table for 'dan1' with reporting codes 17411, 17421, 17431, 17410, 17420, and 17430. The 'XML attribute' section lists attributes dan1 through dan3.

- Example of data prepared for VAT Control statement reporting

The screenshot shows a 'Lines VAT CS - Detail' view with a table of VAT data. The table includes columns for XML element name, XML attribute name, Date of VAT register, Tax exempt number, Invoice, Voucher, Sales tax group, Account number, Customer/Vendor, Sales tax, Sales tax amount, Amount, and Deductible amount. The data shows various VAT entries for different customers and dates.

- Possibility to adjust some information before export of VAT Control statement xml file

The screenshot shows a 'Value changes' section with two tables: 'Original values' and 'New values'. The 'Original values' table shows an invoice from 25.10.2024 with subject code C200020699 and VAT repair code 'Unspecified'. The 'New values' table shows the same invoice with subject code '4' and VAT repair code '15 000,00'.

- Possibility to create either basic VAT Control statement or Group VAT Control statement

The screenshot shows a table of file control statements and a detailed configuration dialog for creating a new one.

Table Headers:

- From date
- To date
- Declaration type
- Settlement period
- Comments

Create file control statement Dialog (Right):

- Parameters**
 - PERIOD**
 - Settlement period: CZ01

1.4 BANK model

- Example of Export (ER) file and Import file setup
- Parameters of automatic settlement

The screenshot shows the 'Methods of payment - vendors' configuration screen. The 'Settlement criteria' section is highlighted with a red box. It contains the following fields:

- ACCOUNTS RECEIVABLE:** Payment reference (radio button set to 'Ano')
- ACCOUNTS PAYABLE:** Payment reference (radio button set to 'Ano')
- Trim payment reference left zeros:** (radio button set to 'Ne')
- Bank account:** (radio button set to 'Ano')
- Amount:** (radio button set to 'Ne')
- COMMON:** Maximum difference (text input field showing '0,00')

1.5 FA model

- New posting types

The screenshot shows the 'Fixed asset posting profiles' configuration screen. The 'Acquisition' section is highlighted with a red box. It lists the following ledger entries:

- Acquisition adjustment
- Depreciation
- Depreciation adjustment
- Revaluation
- Write up adjustment
- Write down adjustment
- Disposal - sale
- Disposal - scrap
- Provision for reserve
- Transfer from reserve
- Extraordinary depreciation
- Special depreciation allowance
- Pre-Acquisition
- Disposal - gift**
- Disposal - deficit**
- Reversal of impairment**
- Impairment of Asset**

- Extension of number of digits in adjusted Depreciation rate

The screenshot shows the 'Depreciation groups' screen in the Microsoft Dynamics 365 Finance and Operations module. The left sidebar lists various modules like Domá, Obíbené položky, Nedávné, Pracovní prostory, Moduly, Accounts payable, Accounts receivable, Asset leasing, Asset management, Audit workbench, Budgeting, Cash and bank management, Common, Consolidations, and Cost accounting. The main area displays 'Depreciation groups' with two entries: 'ZR1+10' and 'ZR1a'. The 'ZR1+10' entry has a description '1.gr. accelerated (zrychlené)+10%' and a book 'TAX-ACC'. The 'ZR1a' entry has a description '1a.odpisová sk., zrychlené' and a book 'TAX-ACC'. Below this is a table titled 'Rate Lines' with columns: Start date, Depreciation rate for the first year, Depreciation rate for next years, and Adjusted acquisition price. A row for 'ZR1+10' shows a start date of '01.01.2007', a first-year rate of '2,8571430000' (highlighted in red), a next-year rate of '4,00', and an adjusted acquisition price of '3,00'.

- Extended Depreciation convention to Next month 1st

The screenshot shows the 'Fixed asset group books' screen in the Microsoft Dynamics 365 Finance and Operations module. The left sidebar lists various modules. The main area shows 'Asset group books' for 'ACC-LIN-RE' with fields for 'Fixed asset group' (012100), 'Book' (ACC-LIN-RE), 'Depreciation group' (empty), 'Posting layer' (Current), 'Round off depreciation' (1,00), and 'Round off depreciation in reporting cu...' (0,00). On the right, there are sections for 'General', 'DEPRECIATION', 'DEPRECIATION PROFILE', 'Method', 'ALTERNATIVE DEPRECIATION PROFILE', and 'EXTRAORDINARY DEPRECIATION PROFILE'. In the 'General' section, there is a 'Calculate depreciation' toggle switch set to 'Ano'. In the 'DEPRECIATION' section, 'Service life' is set to 3,00 and 'Depreciation periods' is set to 36. The 'Depreciation convention' dropdown menu is open, showing options like 'None', 'Half year', 'Full month', 'Mid quarter', 'Mid month (1st of month)', 'Mid month (15th of month)', 'Half year (start of year)', 'Half year (next year)', and 'Next month 1st'. The 'Next month 1st' option is highlighted with a red box. Other sections include 'Depreciation profile' (LIN-REM), 'Method' (Straight line life remaining), 'Period frequency' (Monthly), 'Depreciation year' (Calendar), 'Alternative depreciation profile' (empty), and 'Extraordinary depreciation profile' (empty).

1.6 SAPU model

- Mass dissolving of additional charges to multiple Invoices

The screenshot shows a software interface for managing financial operations. The left sidebar lists various modules under 'Finance and Operations'. The main area displays a table of invoices, with the first row highlighted in blue. The table columns include Item, Description, Internal invoice, Invoice, Date, Inventory date, Quantity, Amount, Adjustment, and Purchase order. A red box highlights the 'Charges' tab in the top navigation bar, and another red box highlights the 'Batch dissolution of ancillary costs' option in the dropdown menu.

Item	Description	Internal invoice	Invoice	Date	Inventory date	Quantity	Amount	Adjustment	Purchase order
